

Paolo Ligsay

Front End Developer

 paolomartinligsay.netlify.app  0922 991 6429  paolomartinligsay@gmail.com

PROFILE

An enthusiastic Front-End Engineer with around 4 years of experience in programming and creating dynamic websites. Thrives in challenging environments, flexible and able to produce high quality deliverables.

PROFESSIONAL EXPERIENCE

Software Engineer @ OneTeamAnywhere, PH

August 2023 - Present // Philippines

▷ My current role involves leveraging React, React Admin, and Material UI to craft dynamic web pages, focusing primarily on front-end development. I specialize in transforming UI/UX designs into interactive and user-friendly experiences.

Front End Developer @ Code & Theory, MNL

January 2022 - June 2023 // Ortigas, PH

▷ Developing websites with a wide variety of tech stack to meet client's requirements and features. We always give importance and promote accessibility (A11Y) on all projects to let people with disabilities access these websites with ease.

Associate Technical Support Engineer @ Oracle NetSuite

January 2021 - September 2021 // Makati, PH

▷ Provided appropriate solutions and alternatives to US clients for issues regarding the following but not limited to: ODBC connection, SQL Queries, Integrations via SOAP XML, JSON and RESTlet Scripts, UI and Server scripting using Suitescript APIs, Etc.

Jr. Front End Engineer @ Upward Next inc.

July 2019 - January 2021 // Makati, PH

▷ Collaborated with a team of Filipino Developers and Japanese Designers to produce responsive web applications.

EDUCATION

FAITH Colleges, Batangas PH — BS Information Technology

2015 - 2019, Emilio Aguinaldo Scholar

▷ Focused Front End Development with a Back End Development background.

PERSONAL PROJECTS

Project:Next — React, NextJS, Tailwind, Storybook, Plop, Jest

<https://github.com/paoloLigsay/projectnext> | <https://projectnext-git-develop-paololigsay.vercel.app/>

▷ A public repository created for a comprehensive demonstration of a typical project workflow and the essential dependencies commonly employed in front end development.
▷ Showcases my knowledge with NextJS, a React framework, and help other developers understand and encourage them to leverage these technologies to their fullest potential.

Spotify Profile — Spotify API, Vue.js, Fetch API, SCSS

<https://yourspotifyprofile.netlify.app>

▷ Web based Spotify Clone using Vue JS and Spotify Web API.

The Pokemon Project — PokeAPI, React JS (Version 2), Typescript, Vue.js (Version 1)

<https://theultimatepokedexreact.netlify.app/> | <https://theultimatepokedex.netlify.app/>

▷ A Web App that Lists all Pokemon Information including type, image and abilities.

SKILLS

Programming Languages, Libraries & Frameworks

HTML5, Pug, CSS3, SASS, Styled Components, Material UI, JavaScript, TypeScript, React.js, React Admin, Next.js, Vue.js, NodeJS, Storybook, TailwindCSS, Jest

Tools & Platforms

Firebase, Heroku, MongoDB, MySQL, Netlify, Git, Vercel, NPM, Yarn
